**Shelf Life:** For fresh shipped product: 13 days from the date of manufacture.  
For frozen product: 6 months from the date of manufacture.

**Storage Conditions:** Fresh baked product is intended for storage at room temperature, but may be refrigerated or frozen. Generally, the product should be stored in a cool, dry place.

Fresh dough should be kept refrigerated, or frozen before preparation for intended use.

Proper refrigeration of frozen product should be maintained to preserve its frozen condition for safe longer term storage.

**Microbiological, chemical and physical properties:**

1 Regular certified laboratory testing of product contact surfaces is done to ensure the absence of microbiological contaminants as part of our complete HACCP program..

2 Only approved food grade chemicals are used in conjunction with the operation of plant equipment, and only approved chemical agents are used in the sanitation of all production areas.

3 Strict adherence to GMP standards, with regular in depth plant inspections for physical risk assessments, including metal detection control points, form an essential element of our BRC program through which the plant facility maintains its accreditation by BRC.

**Method of product preservation:** Calcium propionate is used to retain freshness.

**Packaging:** The packaging bag is composed of an LDPE (Low Density Polyethylene) material.

**Directions for use:** Baked good are ready to eat, while parbaked goods require appropriate baking procedures. Fresh dough products of course, require proper baking methods before consumption.
